

Web Development Module 09

The Big Picture

Boot Camp Pointers

As you work through this module, remember the following:

01

The second phase of the course is more technical than the first. Consider creating study groups outside of class time.

02

Use Slack channels to create connections with other students and start building up your network.

03

Meet up with your study group over Zoom and pair program with your classmates.

This Week: Node.js

This Week: Node.js

By the end of this week, you will be able to:

Build interactive command-line applications that process user input.

Explain modularization and how it relates to npm and the Node.js standard library.

Initialize new Node.js projects with npm, and install and import dependencies.

Explain the importance and usefulness of ES6+ concepts such as `let`, `const`, and arrow functions.

Handle asynchronicity using callbacks and Promises.

This Week's Assignment

How will you use this module's content in your next assignment?

Career Connection

How will you use this module's content in your career?

How to Succeed This Week

Tips for Success: Node.js

Keep these tips in mind:

01

Node.js may seem like a totally new technology, but it's important to remember that it's just JavaScript!

02

You may be tempted to make things more complex than they are. Approach Node.js the same way you approached JavaScript.

03

Node.js is just one way to work in the back end. Focus on the concepts you're learning, because you'll be able to apply them to any other back-end language.

Today's Agenda:

Which skills will you learn today?

**Make sure that you've downloaded
the relevant class files!**
