

## Web Development Module 12

# The Big Picture

---

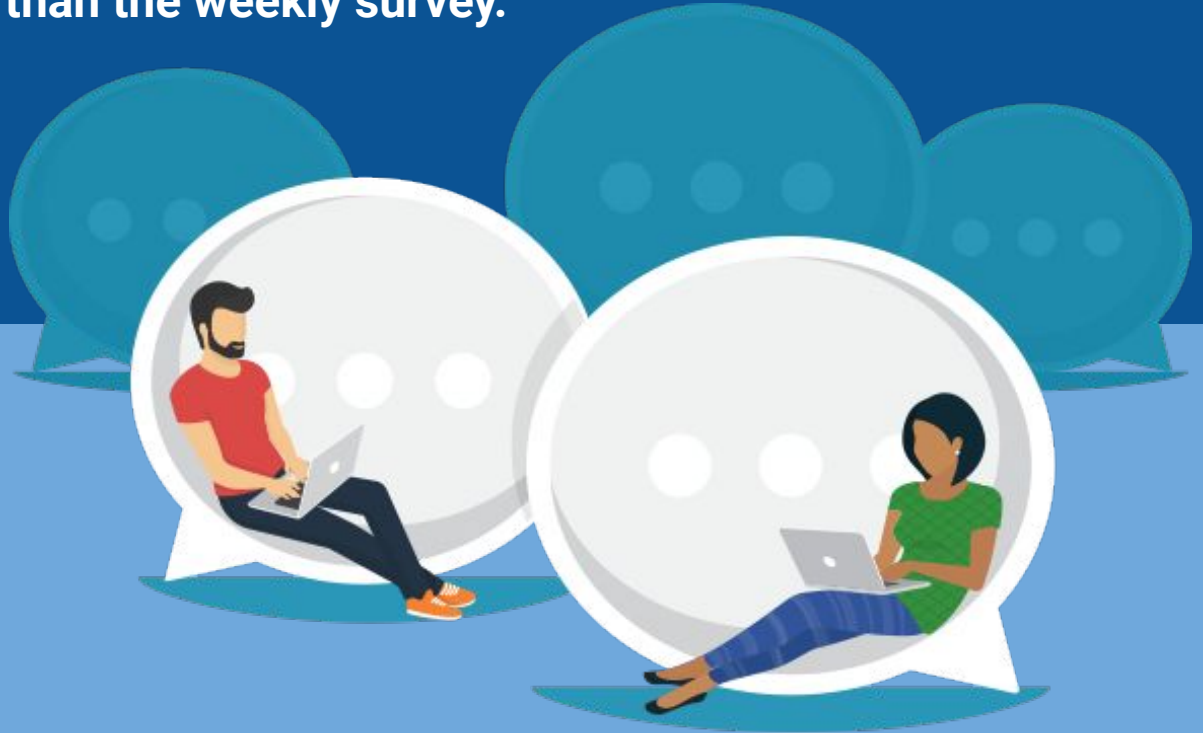

# Congratulations on reaching the midpoint of the program!

---

**You'll be asked to take a mid-course survey soon.  
It will be a little different than the weekly survey.**

**Make sure not to rush  
through the questions.**

**We want to hear  
what you have to say!**

# **This Week:** SQL

# This Week: SQL

---

By the end of this week, you'll be able to:

Configure a Node.js application to connect to a SQL instance.

Create and drop databases and tables.

Explain and execute CRUD methods.

Create schema and seed files for development and production.

Write join statements to establish relations between data in one or more tables.

Explain the use and importance of prepared statements.

---

## **This Week's Assignment**

How will you use this module's content in your next assignment?

## **Career Connection**

How will you use this module's content in your career?

# How to Succeed This Week

## **Quick Tip for Success:**

We will cover MySQL in this module, but there are many variants of SQL. Learning more than just one variant of SQL on your own will make you even more employer-competitive and well-prepared for your first developer role!

## **Today's Agenda:**

Which skills will you learn today?

**Make sure that you've downloaded  
the relevant class files!**
